

Food & Beverage

We at **Kinetic** have been serving the **Food & Beverage Industry** with high value-added engineering solutions for the past decade. We provide complete range of process control products which include the below mentioned applications:

- Water clarifying and coagulation tank transfers via butterfly valves, gate valves, and ball valves.
- Filtration and chlorination tanks, control valves and pressure switches.
- Syrup and water mixing applications, stainless steel valves, valves pneumatically and electrically actuated
- Carbonation CO2 regulators, fittings
- Bottlewasher, steam components, blowdown valves, angleseat valves
- Steam system components for food blowdown valves, electrically/pneumatically actuated valves
- Valves for washdown chemical systems and pressure switches
